How can I purchase goods and services under this Contract?

Any ETB or school that has a requirement for Standard Specification Hybrid Computers may access the goods and services through Direct Draw Down. There are a number of stages to be followed to access goods and services.

- 1.** Prior to placing an order, you must complete and sign an NAGSF (Notification to Activate Goods and Services Form). The NAGSF is available upon request from the Supplier's Web portal or email address. This is a form which extends the validity of the terms and conditions of the contract to include your organisation. After signing, it must be sent to the supplier who will countersign and return it to you.
- 2.** Once the NAGSF is signed by both parties you can order goods and services using the Supplier's Web Portal, by email or by phone. The NAGSF only needs to be completed once, after which you can use the contract as often as needed.
- 3.** Following receipt of an order, the supplier will confirm the order by return e-mail or fax, process the order and make the delivery.
- 4.** The supplier will then issue an invoice.
- 5.** You must sign the Proof of Delivery (POD) on receipt of goods or services.
